

# Welcome to ege's world of endless carpet design opportunities

ege is one of the leading European suppliers of unique carpet solutions. We provide a carpet concept focusing on our three core values: design, quality and respect.

Explore our lightweight Avia Carré carpets that have several unique characteristics. Due to our modern and innovative production process, we offer you total freedom of design. You can choose any colour and any design you like – and we will be able to fulfill your demand.

ege meets the strict requirements of the aviation sector. We are specialised in producing lightweight carpets in a very strong

quality and with a remarkably short production lead time. To ensure safety on board, the products pass the requirements according to FAR §25.853.

Respect is something we give and responsibility is something we take. Being the first carpet company in the world to obtain the very comprehensive CSR certificate DS 49001 we have cemented our environmentally friendly profile. We are EMAS certified as well.

Reach new heights with your aircraft interior. Explore space with ege.

### We believe the environment is a serious matter

We work hard to minimise the environmental impact caused by the production of our carpets.

ege's declared CSR objective is to contribute to a more sustainable world by continually striving to improve how we handle environmental, social and financial challenges, for the benefit of future generations. For instance, we are the only carpet manufacturer in the world to have gained the CSR standard DS 49001, which is the Danish version of the internationally recognised ISO 26001 standard. DS 49001 is a management system for corporate social responsibility, which creates sustainable business processes. Certification requires ege to conform to a broad range of requirements related to good leadership, human rights, labour conditions, environmental conditions, sound business practices and consumer relations as well as local community development and involvement.

#### Avia Carré Ecoline produced from 100% recycled yarn

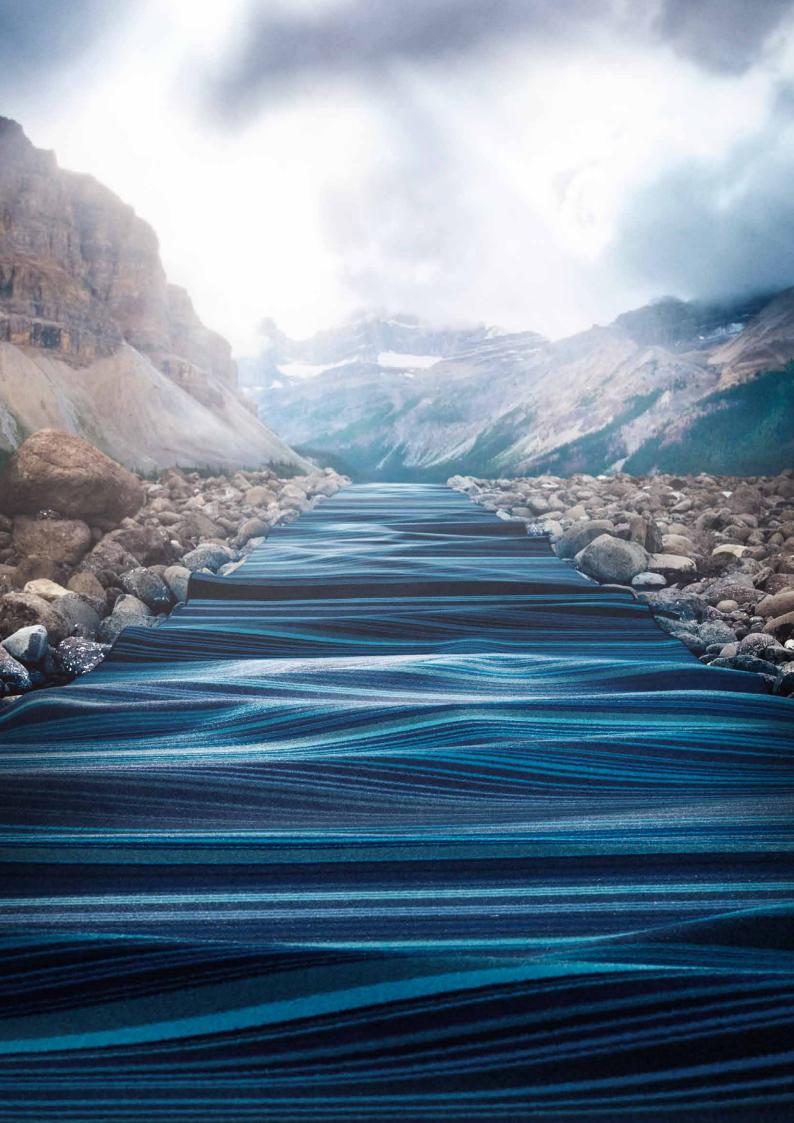

We have taken up the challenges involved in reducing, regenerating and recycling. Therefore, our Avia Carré Ecoline collection is produced in an innovative lightweight material that reduces the fuel consumption and on top of that, the collection gives you total freedom of design meaning that any imaginable design is possible.

#### From regenerated fishing nets to carpets

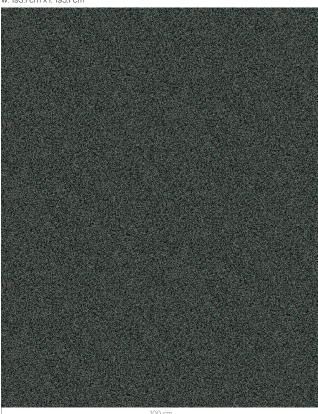

Fishing nets account for one tenth of the waste in the ocean. Abandoned fishing nets can drift for months or years and be a threat to sea life. At ege we use Aquafil's ECONYL® yarns produced from fishing nets. Once the fishing nets are collected and cleaned, they are physically and chemically broken down and reborn as strong and hardwearing yarns for carpets. Other components are fluff and yarn leftovers from production.

The carpet fibres are white and can therefore be dyed on our Millitron dyeing system. This means that we can offer you beautiful and modern carpets that combine flexibility, comfort and environmental benefits.

# Avia Carré Ecoline

Avia Carré Ecoline offers you freedom of design meaning that almost any imaginable design is possible. Due to our advanced colour technology, we can fulfill your design dreams. Avia Carré Ecoline has a unique green profile due to the fact that it is produced from 100% regenerated yarn. This collection is produced in an innovative lightweight material.

#### The Avia Carré Ecoline concept offers:

- Total freedom of design and colours
- Environmentally friendly
- Effective noise reduction
- Resistant to soiling
- Easy maintenance and cleaning
- Very durable
- Antistatic properties
- 48-hour sample service

### The design process

#### Idea

At ege, we take pride in listening to your story, your ideas and your wishes. Whether you have a sketch or an abstract idea. To that, we add our expertise, experience and creativity to make a design suggestion that fulfills all of your dreams.

### Design print & design layout

The next step is creating a design print, which is an initial suggestion of the layout, for instance based on your sketch, photos and atmospheres from existing collections as inspiration. This process continues until you have approved the design print. After that, we make a design layout that illustrates how the textile flooring will look in a room setting.

#### Sample

As there is a difference in seeing the design on a printout versus seeing and feeling it on a piece of actual textile flooring in the specified quality and design size, we always make a 1 x 1 m sample before we go into production.

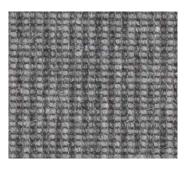

#### 2D presentation

When you are set on the layout, we make a 2D presentation that allows you to make sure that the chosen design corresponds with the actual architecture.

### Planning

Finally, on behalf of your wishes and requirements we schedule when to produce, deliver and install your custom textile floor. We have one of the shortest lead times on the market and can produce your textile flooring within 2-3 weeks from approval. The design lead time is 1-2 weeks depending on complexity and size of order.

STRUCTURE

EXTREME

## **Avia Extreme and Avia Structure**

#### Avia Extreme

Avia Extreme is an exclusive, flat woven textile flooring in 20% polyamide and 80% pure, new wool that adds a luxurious look and feel to the cabin. Avia Extreme comes in 9 colours that all match the modern aircraft interior. The collection is produced in a lightweight quality and meets some of the market's strictest requirements in terms of durability and quality.

#### The Avia Extreme concept offers:

- 9 colours
- Effective noise reduction
- Resistant to soiling
- Easy maintenance and cleaning
- Very durable
- Antistatic properties
- 48-hour sample service

#### Avia Structure

Avia Structure is a stylish textile flooring in an elegant flat-woven quality. This lightweight collection has a simple and minimalistic expression that perfectly matches the modern aircraft interior. The collection is available in 12 colours, which have been carefully selected to match the latest colour and material trends on the aviation market. Avia Structure meets some of the market's strictest requirements in terms of durability and quality, making it easy for you to find a solution to suit the requirements and needs of any individual project.

### The Avia Structure concept offers:

- 12 colours
- Effective noise reduction
- Resistant to soiling
- Easy maintenance and cleaning
- Very durable
- Antistatic properties
- 48-hour sample service
- Custom colour from 200 m<sup>2</sup>
