

A black and white photograph of a textile loom. The image shows a dense array of threads running horizontally across the frame. A shuttle, a tool used in weaving, is positioned in the center, partially obscuring the threads. The background is blurred, showing more of the loom's structure and some industrial equipment. The overall tone is industrial and focused on the craft of weaving.

robusta

Specialized textile weavers since 1960

Specialized textile weavers

for carpet and industrial applications since 1960

Robusta B.V. is a family owned business dedicated to weaving various kinds of fabrics. Since its founding in 1960, the organization is located in Genemuiden. Over more than 50 years some major changes have taken place. Robusta has changed from a coir weaver and rushes trade to polypropylene (composite) fabrics for civil engineering and woven carpet made with natural yarns and synthetic yarns. The customer's wishes, the discovery of new materials and new technical possibilities provide interesting and innovative developments.

Robusta can process natural materials like rush, jute, sisal, wool, basalt, silk and steel and synthetic fibers such as polyethylene, polyester, polypropylene, polyamide, dyneema, high modulus yarns and composites or combinations. You can also consult Robusta for specific needs, new materials and technical capabilities, to develop new (sometimes revolutionary) products.

In our carpet division we manufacture a wide variety of carpet in various yarns and constructions. Rolls for wall-to-wall applications in residential or commercial areas, but also an extensive variety of area rugs in all sizes and with various border finishings, for use in homes, outdoor living spaces or commercial areas.

Robusta B.V. complies with management system certification according to ISO 9001 and ISO 14001

Sisal · Fine Bouclé

Fine Bouclé is traditional sisal weave with a long history. Beautiful to use wall-to-wall or as rug. Our Sisal carpet is timeless, with a rich history in all kinds of interiors all over the world.
