

I love you

Soft, sweet, tender, beautiful. We relate all these qualifiers to a kiss from someone we love and those qualifiers are also applied to the new artificial grass BESO by Sumigran

The new artificial grass BESO opens a new concept of grass in the current market and positioning in which it is located. There has been a lot of time spent studying the tastes, trends and preferences of customers and users, a lot of experience dealing directly with the customer and end user and a lot of effort from the design and production areas to create a unique product

The new BESO grass offers an image of "natural" artificial grass, aesthetically cared for down to the smallest detail, using manufacturing technology and quality in its raw materials and fiber derived from products from much higher ranges ("Premium" range and "Luxury")

BESO grass is a quality artificial grass. A grass designed in a fiber height of 33 mm high with a filament configuration of 10 straight yarns + 8 curly yarns, which makes it unique in models of its price range, using polymers of the highest quality in the production of its fiber, micromonofilament yarns in "U" and more than 900 gr / m² of fiber in its composition

There is nothing quite like it today. It is absolutely unique

And since kisses are not bought, but are given away, in artificial grass BESO this idea has been linked to the final product, reducing its cost and price to the minimum possible expression. The balance in avant-garde, ingenuity, technology, quality and the very adjusted price at which it is offered makes it one of a kind

Inexpensive artificial grass, with a very natural appearance and using products and raw materials of the highest quality and development ... it could be the best quality-price artificial grass

Do you want a kiss?

DENSITY
14175 stitches / m ²

APPEARANCE

PILE WEIGHT
956 grammes / m ²

SHAPE OF YARN

PILE HEIGHT
33 mm

A CLOSER LOOK

LEVEL OF USE
Intense, it is going to be stepped on continuously

High, it will be stepped on frequently
--

Medium, you will step on it just occasionally

Low, merely decorative

TYPICAL USES
<ul style="list-style-type: none"> gardens of apartment block communities community pools, etc...

<ul style="list-style-type: none"> private gardens swimming pools any other frequently walked-on area, etc...

TECHNICAL CHARACTERISTICS OF THE YARN

DTEX	9200
Filament configuration	10 straight + 8 curly

Straight yarn

Structure	Micromonofilament (MMF)
Shape	Concave U-shape
Composition	Polyethylene
Colour shade	Two-tone green (two colours)
Matte treatment	Yes
UV stabilised	Yes
Respectful with the environment	Yes, free from lead and cadmium

Curly yarn

Structure	Textured
Composition	Polypropylene
Colour	Beige and brown

TECHNICAL CHARACTERISTICS OF THE BACKING

Primary support composition	Polypropylene and acrylic fiber veil
Primary support layers	1
Reinforced with net	No
Primary support weight	100 grammes / m ²
Support coating	Latex
Support coating weight	900 grammes / m ²

GENERAL TECHNICAL CHARACTERISTICS

Type of manufacturing system	Tufted cut pile + curly yarn
Gauge	3/8"
Stitches per m ²	14175 (+/- 10%)
Stitches rate per 10cm	13 (+/- 1)
Pile height	33 mm (+/- 5%)
Total height	35 mm (+/- 5%)
Pile weight	956 gr / m ² (+/- 10%)
Total weight	1956 gr / m ² (+/- 10%)
Dimensional stability	+/- 0,60 %
Water permeability	40 litres / minute / m ²
Fire resistance classification	Efl
Installation	Floating without silica sand infill (optional)
