woven flooring

WOVENFLOORING

BY DICKSON

The Dickson Woven Flooring collection combines Dickson's expertise with the contemporary vision of our designers. The fresh perspective and distinctive identity cultivated by the Dickson Design Studio are artfully expressed in the collection's eight ranges.

The rich textures inspired by nature and elegantly subtle and sophisticated colors reveal the esthetic qualities of our raw material for resolutely designer flooring.

Its refined and timelessly neutral color palette comes in a range of deep, delicate hues. Bold colors add character and personality, while a selection of graphic effects, from classic to daring, create distinctive looks.

Écume J543 Vertigo Blue & J544 Diamond Blue

MIRAGE

WOVEN FLOORING BY DICKSON

The texture of Mirage is inspired by the sisal effect. The raw, lively, irregular surface relief varies from profound and powerful to lighter effects. This intense range has a color palette enlivened by a smattering of light and luminous hues that bring out its darker tones to full effect.

NEW FLOORING CONFIGURATOR !

www.dicksonflooringproject.com

Each room raises new challenges. That's why our

CONFIGURATOR ALLOWS UNPRECEDENTED SCOPE FOR TESTING AND MODULATING FLOOR SURFACES

From offices to hotels to homes, each space is unique, and so are your design choices. Now available to order in multiple shapes, Dickson Woven Flooring offers countless layout possibilities. Free yourself from standard layouts or complement them by mixing references and shapes to create rhythm, perspectives and reflections to transform interiors.

Allow your imagination free rein by playing with lighting, textures and reflections. With our ranges and their palette of unique colours to choose from, create your own rules and transform your flooring into a design feature.

Your floor becomes
**A FORM OF CREATIVITY,
FLOORING AN ART FORM.**

DICKSON FLOORING

THE LOOK AND FEEL OF TEXTILE WITH TOTALLY UNIQUE PROPERTIES

Woven from revolutionary fibres, Dickson® floor covering options combine the remarkable durability of vinyl with the aesthetic appeal and texture of traditional carpeting.

A true technical innovation developed for the most demanding public areas, such as hotels, offices, shops, restaurants, etc., Dickson® flooring is durable, comfortable, easy to maintain and attractively designed.

- 5. Acoustic foam

INNOVATION DICKSON'S GROWTH ENGINE

Dickson focuses its research on fine-tuning new, high-performance materials. The R&D and design teams therefore work year round with the finest international laboratories and trend agencies to create truly differentiating products that stand out as genuine home improvement solutions. To minimise fraying while cutting carpeting and to guarantee quality at each stage of the production chain, Dickson has acquired three extrusion lines to create its own yarn.

By utilizing bi-color yarns and unique weave structures, our Design and R&D department developed a chameleon product that yields a change in perception according to the reflection of light and placement of patterns. Dickson has pushed the woven flooring limits by creating a living product with 3D and holograms effects that offer a modern and sophisticated touch to any atmosphere.

GLOBALLY RECOGNIZED QUALITY

The world's benchmark for technical textiles, Dickson is both the designer and manufacturer of its products, managing the entire production chain from A to Z and all our woven flooring materials are Made in France. Quality control is a way of life, an integral part of the company's operations. Each square metre produced undergoes a series of in-house tests. Thanks to these rigorous standards, Dickson is able to guarantee some of its products for up to 15 years.

ENVIRONMENTALLY FRIENDLY

AN ENVIRONMENTALLY FRIENDLY COMPANY

Well aware of the environmental stakes, Dickson launched a major campaign under the banner of its GreenOvation initiative. By optimising its energy management, minimising the use of chemical substances, obtaining ISO 14001 and OHSAS 18001 certification and so forth, Dickson has clearly established its position as an eco-friendly business that cares about curbing its environmental footprint as much as possible.

0% PHTHALATE

To improve the well-being of users, air quality and indoor comfort, the woven upper layer of our Dickson floor coverings has always been phthalate-free.

As we believe quality materials play a vital role in their environment, the challenge presented by this new collection for our R&D department was to successfully produce flooring with 0% phthalate - including the bottom layer - and free from plasticizers.

This commitment to remove controversial substances from our new collection reflects Dickson's innovation approach to the environment and complies with European REACH standards.

FLOORSCORE CERTIFICATION

Good indoor air quality is essential because people spend most of their lives indoors. The air we breathe affects both our health and our well-being, from minor disturbances, such as odours, skin and eye irritations, to the development or aggravation of more serious ailments, such as respiratory allergies.

Independently tested and certified by the Resilient Floor Covering Institute (RFCI), Dickson® flooring meets the official emissions criteria for volatile organic components (VOC) and is recognized as contributing to good indoor air quality.

COMFORTABLE & DURABLE

FLOORS PLAY A KEY ROLE IN THE COMFORT OF A ROOM

To ensure optimum convenience and well-being, our R&D team has created ultra-smart flooring solutions using advanced technology: thermal and acoustic insulation, a non-slip surface that's comfortable to walk on...

EXCEPTIONAL ACOUSTIC INSULATION CAPABILITIES

A leading-edge innovation, the SoundGuard® technology was specifically designed to improve comfort and noise absorption.

Dickson developed a high performance soundproof backing that effectively absorbs ambient noise and significantly reduces the transmission of impact noise.

Acoustic comfort is truly essential to people's well-being and ideal for offices and hotels.

NON-SLIP SURFACE

The woven structure of Dickson® flooring naturally prevents slipping, making it particularly appropriate for public buildings where safety standards often determine the materials decorators can use.

QUALITY THERMAL INSULATION

Good quality thermal insulation can dramatically improve the comfort of a room. Unlike hard flooring, Dickson® flooring offers warmth for greater well-being and energy savings.

ANTISTATIC PROPERTIES

Formulated to minimize static electricity generated from walking on most carpeting, Dickson® flooring solutions provide effective protection against unpleasant shocks.

DICKSON® FLOORING WAS DESIGNED FOR HEAVY COMMERCIAL USE AND RESIDENTIAL USE

Woven from revolutionary vinyl fibres and combined with a high performance backing, it is extremely tough-wearing.

An innovative textile solution at the leading edge of the hottest decorating trends, perfectly adapted to the most demanding environments in terms of practicality and durability.

CLASSIFICATION FOR USE

To meet heavy use classification criteria, our flooring is subjected to standardized tests that reproduce the same tough conditions as the situations in which they are intended for.

The European standard establishes a classification system based on the level of wear and requirements imposed on the areas where each type of flooring will be used.

All our collections have been approved for **33-Heavy commercial traffic**.

This is the highest classification for textile flooring.

FIREPROOF

Dickson® flooring has excellent flame resistance. Our products have been successfully tested and certified in accordance with European (EN 13501-1) and American (ASTM E 648) fire safety standards.

WATERPROOF

Moisture is not a problem for Dickson® flooring. It is waterproof, rotproof and ultra-stable. It is perfectly suitable for wet areas.

COLOURFAST

Even when exposed to intensive sunlight, Dickson® flooring retains its gorgeous original colours.

DICKSON®
woven flooring

EASY

TO INSTALL & TO MAINTAIN

DICKSON® WOVEN FLOORING IS FAST AND SIMPLE TO INSTALL ON ANY KIND OF SURFACE

Like any other flexible flooring, installation is done by gluing the material directly to any kind of flat, clean, dry, stiff surface. To save time and increase flexibility, you can also install the tiles with a non-permanent glue.

THE FIRST WOVEN VINYL FLOORING ENSURING A CLEAN CUT

The FrayGuard® technology developed by Dickson minimizes the common phenomenon of fraying when cutting carpeting and boosts durability of the weave. It guarantees clean-cut edges for fast, efficient, impeccable installation.

TILE

ROLL
Width : 2m

**SHAPE
LAB**

FRAYGUARD®
CLEAN CUT
by DICKSON®

STAIN RESISTANT

Dickson® flooring was designed to resist stains by not absorbing liquids and thus making spills quick and easy to clean.

LOW MAINTENANCE

Cleaning time is minimal. As with linoleum or tiling, basic cleaning can be done with a vacuum, broom and warm water mixed with a neutral detergent.

SMART TIP

The colour of your flooring directly affects the maintenance requirements. Dirt and stains are less visible on chiné (marbled) shades than solid colours (whether light or dark). Depending on the location and the amount of traffic, this is an important aspect to consider when making your selection.

A UNIQUE COMPOSITION FOR EXTREMELY DURABLE, EASY TO MAINTAIN FLOORING

Although the structure of the weave makes it appear to have a certain relief element, the exclusive assembly process used by Dickson guarantees it is absolutely waterproof, dustproof and stainproof. The warp and weft yarns are heat-sealed together and assembled to the backing while they're still hot to prevent the penetration of any dirt or liquids in between the fibres so it stays on the surface for easy clean-up.

Dickson® woven flooring ensures optimal quality sanitary conditions. Rotproof, antibacterial, and impervious to dust mites, mould spores and fungus, the impermeable surface makes it easy to keep clean and prevents tough to remove stains like coffee, wine, fruit jam, blood, etc...
